Label this user

Your task is to understand whether this VKontakte user is a social bot or a real human.

Definitions:

- **Social bot** - a software agent that communicates autonomously on social media. Bots are typically fake accounts with fake personalities.
- **Real human** - an account that belongs to a real person and is not managed automatically.

Please inspect this user and their comments on VKontakte.

For each user, you can see their VKontakte page by clicking "Open VK page".

For each comment, you can see the source comment and post by clicking "See original post and comment".

After you make a decision:

- If you think this user is a bot, press the **"BOT"** button.
- If you think this user is a real human, press the **"HUMAN"** button.

Normally, labelling each user should not take more than 5 minutes.

Scroll down to see user info, comments and buttons.

Your Prolific ID: 12345, Left to label: 1

Justify your decisions

In the form below, please shortly describe which criteria you used to label users.

In my choice between a bot and a human, I am guided by several factors. First, I look at the user's first and last name, how unique they look. I check through the search engines Yahoo or Bing whether there are real
